### **Locate Proposal:**

Locate provides a twist on the typical restaurant application by providing our users with the ability to secure reservations, check wait times, and find recommended menus personalized to them. Locate is based in Richmond, Virginia where a large group of our target market, restaurant goers in metropolitan areas between the ages 25-45, resides. Locate prides itself in aiding users with dietary restrictions to find a yummy and safe meal that they can enjoy worry free. There is a gap in the market for those who want to find a new restaurant they can eat at, without having to research or wait in a long line to get a table. The website will also provide a live wait time list at restaurants nearby to make the user's dining experience more about the time spent eating rather than waiting. Our website will assist in making people's lives simpler and quicker, which is what our brand is all about

*Kind regards,*

**THE LOCATE TEAM:** KATHERINE INMAN, JESSIE BODNER, GRACE WATERS, SHAUN PATEL
